

REGISTERED NURSE

Select Support Services is looking for a caring and capable Registered Nurse to join our team, supporting NDIS participants across Cairns, Innisfail, Mareeba and the Tablelands.

This role would suit someone who enjoys community-based nursing, values genuine relationships, and wants to be part of a team where clinical care, participant dignity and human connection all matter.

At SSS, our nurses play an important role in helping participants feel safe, supported and well cared for in their own homes and communities. You will work alongside participants, families, support workers and care teams to provide respectful, consistent and person-centred nursing care.

As part of the role, you may be involved in health assessments, care planning, medication support, wound care, diabetes monitoring, clinical documentation, staff education and supporting participants with complex health needs.

We are looking for someone who brings strong clinical judgement, excellent communication, accurate documentation skills and a calm, professional approach to care.

ESSENTIAL REQUIREMENTS

- Current AHPRA registration as a Registered Nurse
- Current Queensland driver's licence
- Ability to work within professional scope of practice
- Commitment to participant safety, dignity and quality care
- Willingness to complete relevant checks and onboarding requirements

Previous experience in community nursing, NDIS, disability support, wound care, diabetes education or complex care would be highly regarded.

If you are a Registered Nurse who wants to feel part of a supportive, values-driven team where your work is respected and your care makes a real difference, we would love to hear from you.
