

TEAM LEAD / CLINICAL LEAD

Select Support Services is looking for a caring, capable and experienced Clinical Team Leader to join our team, supporting NDIS participants across Cairns, Innisfail, Mareeba and the Tablelands.

This role would suit a Registered Nurse who is ready to step into a leadership role, or an experienced clinical professional who enjoys supporting both participants and the team around them.

At SSS, our clinical team plays an important role in making sure participants feel safe, respected and well cared for in their own homes and communities. This role combines hands-on nursing care with clinical oversight, team support, care planning and continuous improvement.

As part of the role, you may be involved in health assessments, care planning, medication support, wound care, diabetes monitoring, clinical documentation, staff education, incident review, audit support and guiding nursing staff in safe, person-centred care.

We are looking for someone who brings strong clinical judgement, calm leadership, excellent communication, accurate documentation skills and a genuine commitment to improving health outcomes for people living with disability.

ESSENTIAL REQUIREMENTS

- Current AHPRA registration as a Registered Nurse
- Minimum 3 years' experience as a Registered Nurse
- Current Queensland driver's licence
- Ability to work within professional scope of practice
- Confidence supporting and guiding clinical team members
- Commitment to participant safety, dignity and quality care
- Willingness to complete relevant checks and onboarding requirements

Previous experience in community nursing, NDIS, disability support, wound care, diabetes education, infection control or complex care would be highly regarded.

If you are a Clinical Lead or Team Lead who wants to feel part of a supportive, values-driven team where your work is respected and your care makes a real difference, we would love to hear from you.
